ARCHITECTURAL LIGHTING

FEATURES

This fixture is an excellent choice when an attractive emergency light is required. In cases of AC power loss, it provides a minimum of 90 minutes illumination. A trouble-free lead-calcium battery is provided with the fixture. The lamp heads may be adjusted through the full range of motion because of the special swivel-track design.

BODY

- The thermoplastic housing of the product makes it corrosion-proof and scratch-and impact-resistant.
- UV-stabilization prevents discoloration of the product.
- Compartment shaped by injection.
- Power may be supplied via wall or ceiling

FACE

- Beveled injection molded face with two round lamp heads molded into sloped side surfaces of fixture. Each head holds a 10 watt covered MR16 lamp.

MOUNTING

- Unique "snap-together" universal mounting design permits top, back and side mounting. Necessary hardware and canopy are provided electrical

ELECTRICAL

- 120V or 277V input
- Reset is automatic
- Hassle-free wiring without the need for additional hardware

LAMPS

- Beveled face with (2) 10 Watt MR16 lamp heads

BATTERY

- Indicator light shows high charge and readiness for operation
- Replaceable and requires no maintenance
- When completely charged, supplies emergency power for 90 minutes.
- 6V, 8 amp-hour sealed-lead acid battery works during power failures

TESTING

- Test Button
- Solid state line latched low voltage disconnect to avoid deep discharge
- Safeguarded against short circuits
- Power is automatically interrupted in cases of brown-out

LISTED

- Damp location approved
