

## DIMENSIONS

**14-SMK-UNI-2.3/4IN**  
H = 2-3/4"

**14-SMK-UNI-5.3/8IN**  
H = 5-3/8"

**14-SMK-UNI-7IN**  
H = 6-15/16"

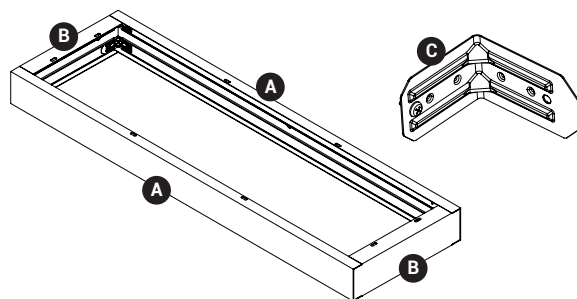

## FEATURES

This universal surface mount kit features a refined, minimal design with no visible hardware, ready for easy field assembly and tool-less maintenance or replacement access.

A modern and convenient mounting solution ideal for use in retrofit, remodel, and low plenum space applications. Accommodates luminaires with remote and regular emergency and control options.

Available in compatible 2'x2', 2'x4', and 1'x4' sizes.

## MOUNTING KIT

(A) Side Panel - Two (2)

(B) End Panel - Two (2)

(C) Bracket - Eight (8)  
(Screws are included)

Example: **24-SMK-UNI-5.3/8IN**

### CONSTRUCTION

Features a robust aluminum extrusion combined with steel compression brackets to create a rigid, all-metal design. These compression brackets securely fasten all four metal sides into a single, unified enclosure body, for a clean, architectural appearance with no visible hardware, tabs, or plastic components.

Engineered to fit most panel and troffer products (see compatibility chart) and accommodates a wide range of factory or field installed emergency, flex, and sensor options. A built-in safety strap keeps removable access panel attached to the ceiling for added installation/servicing safety. Ships as one compact unit and requires field assembly.

### FINISH

Available in a highly reflective, electrostatically applied white polyester powder coat paint to ensure maximum rust inhibition.

### MOUNTING

The mounting design provides four dedicated mounting points for secure surface installation, with a 16" x 16" spacing that aligns easily with standard ceiling studs. Mounting hardware is not included; installers should reference the minimum and maximum weight requirements to select the appropriate hardware for the specific ceiling or surface type.

### WARRANTY

5-year warranty for parts and components (labor not included).

### LISTINGS

UL and cUL recognized accessory for use as field install surface mount kits for luminaire.

Can be used in damp locations. See fixture for primary compliance rating.

Kit does not alter design or construction of luminaire.

Use with fittings identified in SMK instruction sheet to meet UL compliance.

### COMPATIBLE FIXTURES

| 14-SMK-UNI-2.3/4IN                                                                                                                                                                                                                                                                                                                                                                                                              | 14-SMK-UNI-5.3/8IN                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                 | 14-SMK-UNI-7IN                                                                                                                                                                                                                                                                                                                                                                                                                  |
