DESCRIPTION

This fixture can support the use of LED PAR replacement lamps.

1. SOCKET CUP - Die-cast aluminum with medium base pulse rated porcelain socket with nickel-plated screw shell, effectively provides heat dissipation and ventilation. Unitized optics guarantees proper trim to housing installation. Tool-less installation and adjustability from either outside the housing or inside the housing allows the fixture to accommodate three different lamp sizes.

2. MOUNTING BRACKET - Constructed from 16-gauge steel. Butterfly style mounting brackets accommodated. Constructed from 16-gauge steel. Can be installed with 3/4" or 1-1/2" lathing channel, 1/2" EMT, or with optional C-channel mounting bars (Part# BP31) ordered separately. Housing can be adjusted from the inside of the ceiling.

3. RETAINING SPRINGS - Precision tooled springs secure trim to mounting frame, for effortless and tool-less installation.

4. JUNCTION BOX - Is UL listed for through-branch circuit wiring and has four 1/2" KO's, one 3/4" KO and four Romex knockouts with pry-out slots and strain clamps. Junction Box are accessible from below, no tools required.

5. THERMAL PROTECTOR - Meets UL requirements. Standard thermal protection device guards against improper installation, over lamping and misuse of insulation material.

6. MOUNTING FRAME - Die-formed construction for maximum heat dissipation and rust protection.

OPTICS

7. REFLECTOR - Self-flanged .050" aluminum reflector with low iridescent finish. Reflector provides 45-degree lamp-to-reflector image cutoff.

8. GROOVE BAFFLE - Self-flanged one-piece aluminum with concentric rings.

9. LENS - Choice of either tempered clear, tempered prismatic or tempered frosted lens fastened with two torsion springs for easy re-lamping. UL listed for wet or damp location.
