OPTICS AND REFLECTOR

A multi-segmented reflector allows for precise beam control, and offers field changeable optics in Narrow Spot, Narrow Flood, and Flood, with a variety of lumen options. With exceptional flexibility and controlled optics, each luminaire head can be positioned as a source for task, accent, or general illumination. Merchandising is consistently being rearranged, and the multiple combo is the perfect source for highlighting up to 4 different displays with a single housing. Trim options include trim or trimless, with black or white interior finish.

AIMING

The proprietary hot aiming system allows each individual head to be rotated 365 degrees horizontally and 45 degrees vertically, which can be locked into position without the use of tools.

HOUSING

Thermally protected for new construction, non-insulated ceilings or where insulation can be kept 3" from housing, with the ability to vertically adjust to accommodate various ceiling heights. It is fabricated from 18-gauge steel and post-painted, and each luminaire head is fabricated of die-cast aluminum to dissipate heat.

TRIM OPTION

Post-painted powder coated Die-Cast trim ring available in white and custom RAL colors. (Please consult factory for custom paint color options). Trim attaches to the housing with piano springs for snug fit and zero light leakage

TRIMLESS OPTION

Die-Cast perforated mesh cover intended for installation in drywall or plaster ceilings. Mudding may be applied right up to the edge of the luminaire opening to provide a seamless appearance. Trimless accessory is secured to the housing to prevent fractures in the ceiling and/or drywall during and after installation.

MOUNTING FRAME & BRACKET

Pre-installed butterfly brackets can be adjusted vertically with C-Channel mounting bars, allowing housing to be positioned and locked at any point within a 24" joist span. Bar hangers can fit onto a T-Bar spline with additional slots and holes for special mounting methods.

THERMAL MANAGEMENT SYSTEM

Passive cooling Die-cast Aluminum Heat Sink, LED light engine and driver are replaceable, upgradeable, and can be accessed from below the ceiling. The consistency in the quality of light is delivered with precision performance by the use of a unique locking mechanism that aligns the reflector with the light engine.

DRIVER ELECTRICAL INFORMATION

The LED driver is rated for 50 to 60Hz at 120V/277V input, produces less than 20%THD, and has a power factor between 90% and 100%, and is thermally protected for additional safety. Junction box and Driver can be accessed from below the ceiling and above the ceiling. Junction Box is Listed for through branch circuit wiring.

LED DYNAMIC PLATFORM OPTIONS

SMART WHITE - Tunable White with Smart White technology allows the tuning

of luminaires to mimic the natural color patterns throughout the day, enhancing interior office spaces, hospitality, and architectural elements. Tuning of intensity and color in classrooms enables a diversification in student activities, while the use of tunable white technology in healthcare stimulates circadian rhythm, accelerating the healing process. Complementing colors and textures in retail merchandising also has an impact on sales, utilizing the technology to adjust colors throughout the season. A CRI of 90+ is standard, and available on all three platforms. Elite Platform (50K-27K), and LED Engin Platform (65K-18K)
