

DIMENSIONS

2-HOUR FIRE RATING

- Conforms to UL1598, IC ratings for recessed luminaire housings
- Conforms to Metallic Outlet Box, fire rated up to 2 hours
- Suitable for Damp Location
- ASTM E283 Air Tight Certified
- Solution for suspended lights with external drivers
- Painted steel junction box construction
- Fits most surface mount fixtures and retrofit fixtures

ORDERING GUIDE

PART NUMBER

FS-IC-JBOX-ADJ

NOTE: Refer to page 2 for all compatible Elite Lighting Luminaires.

FEATURES

This 4" fire-rated junction box helps bolster fire-safety compliance in low plenum spaces with a can that adjusts to accommodate different ceiling thicknesses. Compatible with existing Elite downlights, adjustable LED trims, and both surface and recessed mount installations. Included quick connector enables use with round retrofit downlights.

Ideal for quick, easy new construction drywall and joist installation, as well as T-bar grid and suspended ceiling applications. IC rated, airtight, and ready for contact with insulation. Damp location suitable.

Heat-resistant steel construction maintains a maximum 2-hour fire-rating to deter fire-spread, when installed according to the International Building Code, Section 714.

NOTE: Metallic outlet boxes with metallic or nonmetallic cover plates may be used in floor-ceiling and roof-ceiling assemblies with ratings not exceeding 2 hours. These assemblies should have gypsum board membranes. The metallic outlet boxes should be securely fastened to the joists and the opening in the gypsum board facing should be cut so that the clearance between the box and the gypsum board does not exceed 1/8 in. The surface area of individual boxes should not exceed 16 sq. in. The aggregate surface area of the boxes should not exceed 100 sq. in. per 100 sq. ft of ceiling surface.
