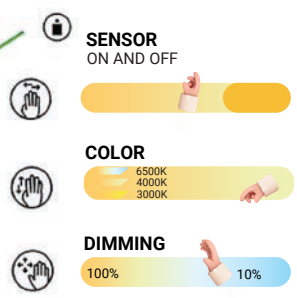
Touch Sensor



FUNCTION OPTIONS

Touch Sensor · CCT Selector · Smart defogger

OPTIONAL FUNCTION

Microwave sensor

Due to the changes of constant improvement in LED technology, all details are subject to change without notice. Consult factory for up to date information.

MAINTENANCE

Use a soft, lint-free cloth or microfiber cloth to gently wipe the surface of the mirror. If necessary, lightly dampen the cloth with water or a mild glass cleaner specifically designed for mirrors. Never use abrasive materials like rough sponges, scrub brushes, or abrasive powders on the mirror. They can scratch or damage the mirror's surface and coating.

OPTICAL SYSTEM

LED frame design provides exceptional light distribution. Illumination is spread around the surface emitting soft, even light.

CONSTRUCTION

Crystal-clear reflection with a combination of blend of glass, aluminum, and PC (polycarbonate). To ensure both strength and versatility, the mirror incorporates PC (polycarbonate) into its construction. PC is known for its impact resistance, making the mirror more resilient to accidental bumps or drops. This material also contributes to the lightweight nature of the mirror, allowing for easy installation and handling.

MOUNTING

Easy to install. Equipped with hangers, making installation a breeze. Whether you choose portrait or landscape orientation, the hangers ensure secure and hassle-free mounting on your desired room. Square Smart LED Mirror offers the flexibility of both portrait and landscape installation, allowing you to customize its orientation to suit your space and preference.

For portrait installation, the mirror stands tall, creating a sleek and vertical design that effortlessly complements any room. This orientation is particularly well-suited for narrow wall spaces or areas where a taller mirror would enhance the visual appeal.

Alternatively, for landscape installation, the mirror extends horizontally, providing a wider reflection area. This orientation is ideal for creating a sense of spaciousness and balance in your environment. It works harmoniously above bathroom vanities, dressers, or other furniture pieces.

OPTIONS

Arc or Flat edge diffuser.

DRIVER ELECTRICAL INFORMATION

Powered by high-quality constant-current power LED drivers wich are rated for 50 to 60Hz at 100-120V/220-240V.
